

Grade 3
Unit 10

Mrs. Topor's class is going to have a class party. Her class has 20 students. Below is a list of things they could buy for their party. They are all listed with their prices below.

Item	Cost
Pitcher of lemonade (10 servings)	\$2.50
Paper cups (Package of 24)	\$0.69
Ice cream bars	\$0.30
Oatmeal cookies (Package of 16)	\$0.99
Bag of popcorn (30 servings)	\$1.09
Napkins (Package of 50)	\$0.49
Mini cupcakes (20 per box)	\$2.25
Fruit punch boxes (10 per box)	\$1.79
Doritos (1 bag serves 15)	2 bags for \$5.00

- A. Mrs. Topor's class has \$10.00 to spend. What items should she buy? How much will she have left over? Show or explain how you got your answer.
- B. Mrs. Topor's class found \$6.00 more dollars. Based on what they **already** have, what additional items can they buy? Show or explain how you got your answer.
