

Grade 3
Unit 17

Ms. Barker's class was going to Lizzy's to get ice cream. There were 40 students in her class.

1/2 wanted chocolate ice cream.

10 wanted vanilla ice cream.

The rest wanted strawberry ice cream.

Draw a square and divide it into fourths. Label each fourth with what the different groups wanted.

Did the same amount of students want vanilla as chocolate? Explain why or why not.
